

SLIMLINE GREENHOUSE & SHED HEATERS

Low Cost

Water Resistant

Fully Certified

Low energy heating for outbuildings & work areas

The new ECOHEATER Slimline Greenhouse & Shed Heaters is one of the most energy efficient ways of providing low cost, ambient heating and frost protection and preventing dampness and condensation in a range of outbuildings, greenhouses, cold frames, sheds, garages and conservatories.

The built-in thermostat switches the heater off when the surrounding area gets too warm, saving electricity.

These compact heaters use less electricity than fan heaters, are cleaner than paraffin heaters and are IP44 compliant making them safe to use in areas where they may come into contact with sprinkled water.

- ✓ **Built-in thermostat**
Keeps energy usage to a minimum

- ✓ **Safe and low cost**
Safe, low cost alternative to an electric fan heater
- and cleaner than a paraffin heater

- ✓ **IP44 rating for water resistance**
For use in areas and environments where water could come into contact with the heater

- ✓ **Available in 3 sizes**
1.5m heater recommended for a 6'x8' greenhouse with smaller heaters ideal for smaller greenhouses, lean-tos and garden sheds

- ✓ **Highly versatile**
Supplied with 2m push-fit cable, plug and brackets for either wall mounted or floor standing operation

- ✓ **Fully certified**
CE approved and BS EN 60335/1:2002 compliant
